

For my first edit, I added a section on local library history for five branches of the Lee County Library System in Florida. I selected branches that did not have their own Wikipedia pages. These are the Bonita Springs Public Library, Captiva Memorial Library, Dunbar-Jupiter Hammon Public Library, Lakes Regional Library, and the Pine Island Public Library. I had previously edited the Wikipedia page for the Johann Fust Community Library.

For my second edit, I added a section on the Stainless Steel Boxing Project at the library at St. Catherine's Monastery at Mt. Sinai. I had originally intended to cite the virtual tour provided by the Bibliographical Society, but I read that Wikipedia is not fond of YouTube videos in citations. I did some research on the project and used information from the Ligatus Saint Catherine Project and the World Steel Association.
